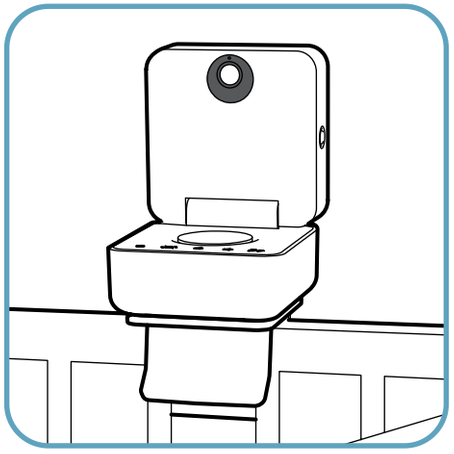
User manual

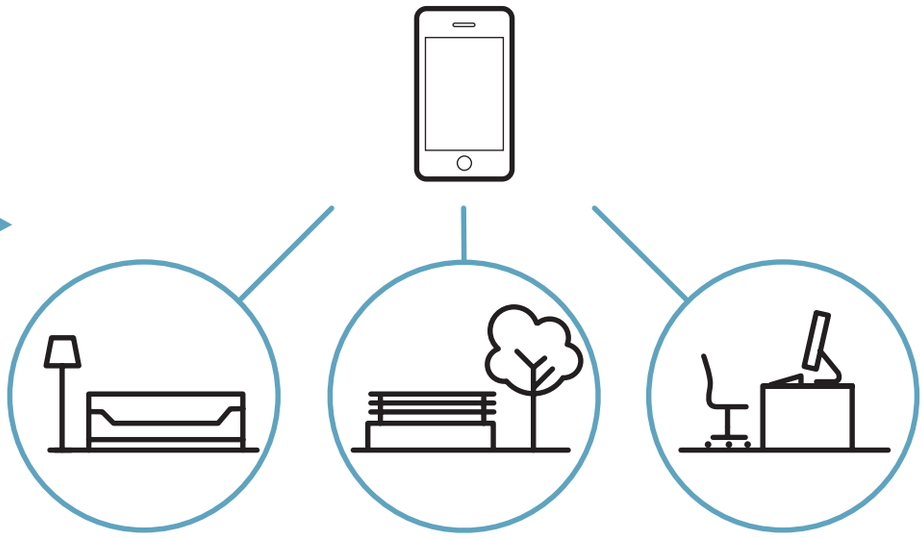
Thank you for choosing the Smart Baby Monitor

The Smart Baby Monitor is a revolutionary baby monitor with the allure of an elegant white music box.

Watch over your child. Interact with him/her. Ensure your baby's comfort from your iPhone, iPad or iPod touch, from anywhere and any time.

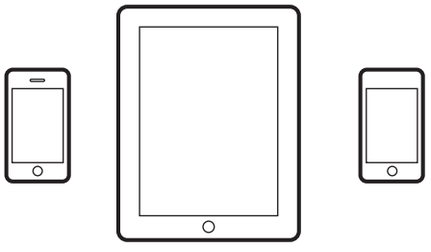


From home or a friend's house



At home or away

Before you start, you need:

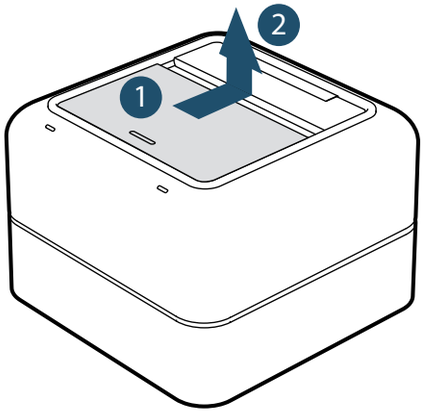


iPhone, iPad or iPod touch

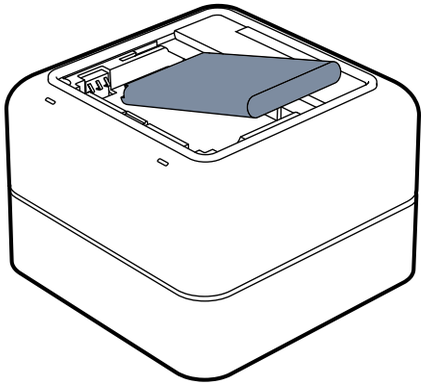
Internet access, via Wi-Fi or an Ethernet cable

① Installing the battery

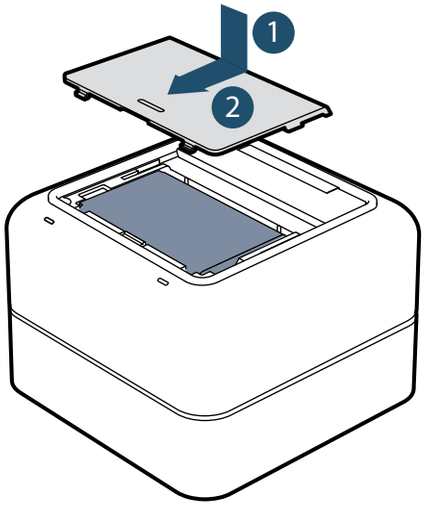
1. Slide open the battery compartment door.



2. Insert the battery.

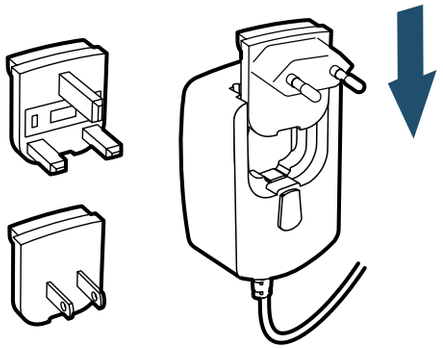


3. Close the door.

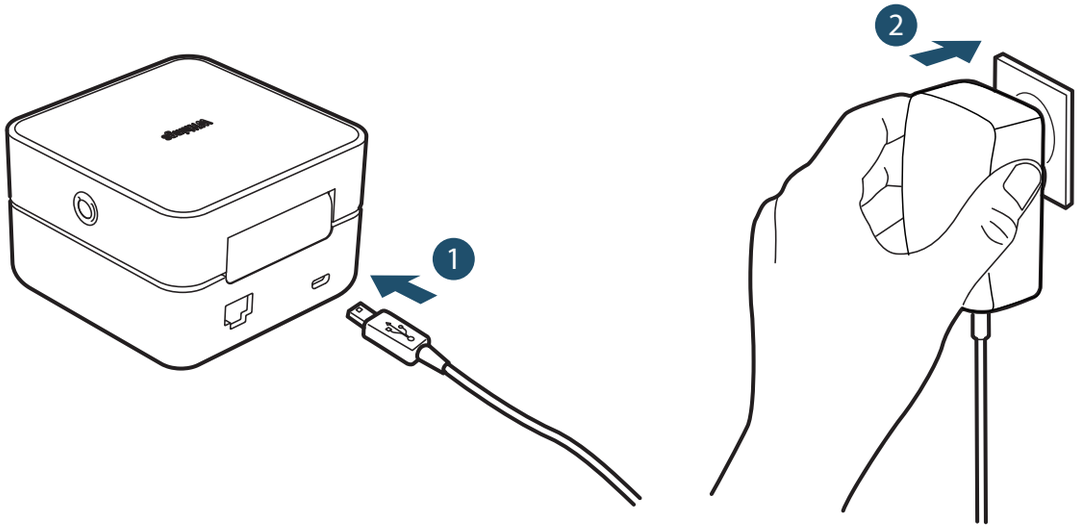


② Plugging in the monitor

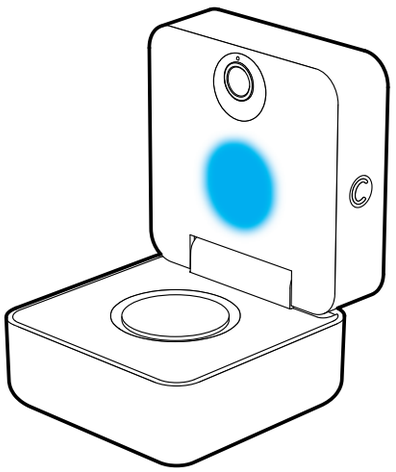
1. Insert the local adaptor on the power supply unit.



2. Plug your Smart Baby Monitor into a power socket.

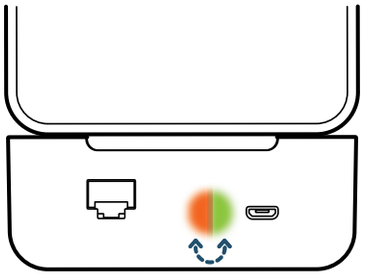


3. The night light turns blue, indicating the monitor is starting up.



3 Connecting the monitor to your iPhone, iPad or iPod touch

Before you begin, check that the light on the back of the monitor is blinking (start-up complete, waiting to be connected).



1. Be sure that your iPhone, iPad or iPod touch is connected to your home Wi-Fi network.

2. On your iPhone, iPad or iPod touch, go to «Settings», represented by the following icon:

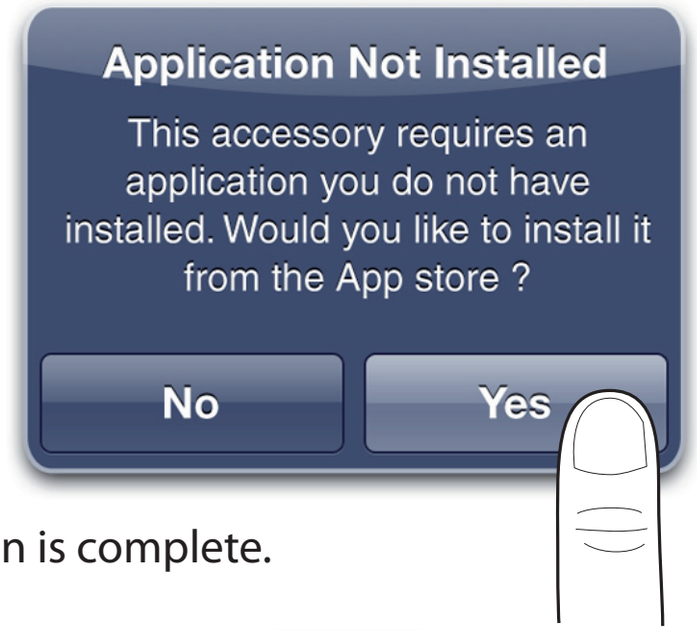
3. Select «General» and then «Bluetooth».

4. Activate Bluetooth by sliding the switch button like this:

5. Select the Smart Baby Monitor from the list; its name starts with «SBM-...»

④ Installing the WithBaby application

1. Accept the automatic installation request by clicking on «Yes».



Application Not Installed
This accessory requires an application you do not have installed. Would you like to install it from the App store ?
No
Yes

2. Wait until installation is complete.

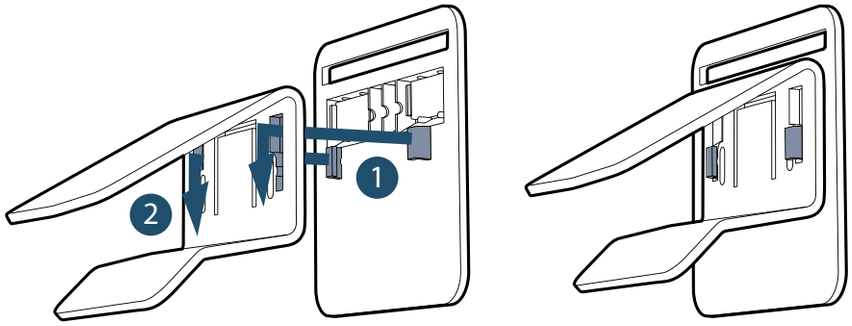
Loading ...

3. Launch the WithBaby app and follow the instructions.

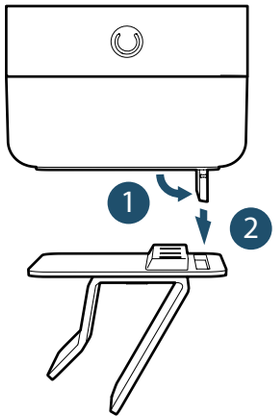
WithBaby

Installing the bedside stand (optional)

1. Attach the two parts together.



2. Attach your Smart Baby Monitor to the stand.



3. Place the stand on the side of the baby's bed.

battery low

Tips

Connecting my iPhone, iPad or iPod Touch via Wi-Fi.

When you're using your monitor at home, we suggest you connect your iPhone via Wi-Fi in order to enjoy better video quality.

Get alerts whenever I want.

Each parent can choose, individually, which alerts they want to receive (noise, movement, temperature and humidity) via the WithBaby app.

Closing my Smart Baby Monitor.

When you close your Smart Baby Monitor, only the video is turned off. You can still receive alerts or listen in on your baby.

Using my Smart Baby Monitor at a friend's.

Once outside your home, your baby monitor automatically connects to your iPhone via Bluetooth so that you can monitor your baby without any Internet connection.

Troubleshooting

The Smart Baby Monitor does not start.

Make sure the power supply unit is plugged into a wall socket and connected to the back of the Smart Baby Monitor.

The Smart Baby Monitor is on, I've activated Bluetooth, but I don't see my device in the list.

For safety reasons, you only can pair with Bluetooth during the first 30 minutes after turning on the baby monitor. All you need to do is restart your monitor to see it in the list.
If the problem persists, make sure you are at least 15 metres from your Smart Baby Monitor before trying again.

I'm connected via Bluetooth, but the iPhone app does not install automatically.

Install the application manually:
- Go to the App Store by clicking on the icon:

- Search for: WithBaby.
- Install the WithBaby app, launch it and follow the instructions.

Safety instructions

This product cannot replace adult supervision. Ensure your baby's health by checking on him/her regularly.
The temperature and humidity sensor only measures the temperature and humidity of the room your baby is in.
It cannot be used to adjust the temperature or humidity of the room. Place the product at least 50 centimetres away from the baby.
This product is not a toy. Do not allow children to play with it. Only use the power supply unit supplied with the product.
Store the product in a clean, dry place at 0° to 50° C. Use the product exclusively at temperatures between 10°C and 35°C.
This device is designed for indoor use only. Never use the product for extended periods in direct sunlight.

FCC Federal Communication Commission Interference Statement
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from thatto which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.
This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
Radiation Exposure Statement:
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
Note: The country code selection is for non-US model only and is not available to all US model. Per FCC regulation, all WiFi product marketed in US must fixed to US operation channels only.
CE
Europe – EU Declaration of Conformity
This device complies with the essential requirements of the R&TTE Directive 1999/5/EC. The following test methods have been applied in order to prove presumption of conformity with the essential requirements of the R&TTE Directive 1999/5/EC:
- EN 60950-1: 2010 Safety of Information Technology Equipment
- EN 300 328 V1.7.1: 2006 Electromagnetic compatibility and Radio spectrum Matters (ERM); Wideband Transmission systems; Data transmission equipment operating in the 2,4 GHz ISM band and using spread spectrum modulation techniques; Harmonized EN covering essential requirements under article 3.2 of the R&TTE Directive
- EN 301 489-1 V1.8.1: 2008 Electromagnetic compatibility and Radio Spectrum Matters (ERM); ElectroMagnetic Compatibility (EMC) standard for radio equipment and services; Part 1: Common technical requirements
- EN 301 489-17 V2.1.1 2009 Electromagnetic compatibility and Radio spectrum Matters (ERM); ElectroMagnetic Compatibility (EMC) standard for radio equipment and services; Part 17: Specific conditions for 2,4 GHz wideband transmission systems and 5 GHz high performance RLAN equipment
- EN 62311: 2008 Assessment of electronic and electrical equipment related to human exposure restrictions for electromagnetic fields (0 Hz-300 GHz) (IEC 62311:2007 (Modified))
This device is a 2.4 GHz wideband transmission system (transceiver), intended for use in all EU member states and EFTA countries, except in France and Italy where restrictive use applies.

In Italy the end-user should apply for a license at the national spectrum authorities in order to obtain authorization to use the device for setting up outdoor radio links and/or for supplying public access to telecommunications and/or network services.
This device may not be used for setting up outdoor radio links in France and in some areas the RF output power may be limited to 10 mW EIRP in the frequency range of 2454 – 2483.5 MHz. For detailed information the end-user should contact the national spectrum authority in France.
